## OBJECTIVE

I am looking for a career opportunity in the eld of web application development. I would like to contribute to a dynamic work environment where I can apply my knowledge to solve technical challenges. At the same time, I would like to grow my career through continuous learning and participate in diverse projects to enhance my skills and contribute to the success of the organization. I can work independently and in a team. And nally, I would like to become a professional full-stack developer.

## TECHNICAL SKILLS

**FRONT-END**

- HTML5, CSS3, JavaScript, TypeScript.
- ReactJS, NextJS.
- Tailwind CSS.
- Material UI (MUI).

**BACK-END**

- NodeJS, Express (Basic).

**DATABASE**

## WORK EXPERIENCE

**VNPT Information Technology Company (VNPT IT)**

**May 2024 - July 2024**

**INTERN**

**During the internship, I explored and worked with Ant Design, Tailwind CSS, and React through real project assignments.**

- Used Git for source code management and version control.
- Contributed to developing and optimizing user interfaces, ensuring compatibility across various browsers and devices.
- Strengthened teamwork, problem-solving skills, and the ability to quickly learn new technologies in a practical environment.

**Building a chatbot system || (Group project)**

- Overview: Developing a chatbot system capable of learning from provided information and embedding the chatbot.
- Contribution: Bot Management (create bots, add files to bots, delete bot files), File Managemen (Upload files, upload files for bots, view files, delete files).

**TS68 Company** **March 2025 - June 2025**

**MAIN STAFF**

- Developed responsive user interfaces using Next.js and Tailwind CSS, based on pre-designed Figma layouts. Took on the role of Front-End Developer while also providing internal IT support.
- Collaborated closely with UI/UX designers and Back-End developers to ensure pixel-perfect implementation and a seamless user experience.
- Handled debugging, performance optimization, and ensured cross-browser compatibility.
- Provided technical support by troubleshooting hardware/software issues and assisting in maintaining internal systems.
- Demonstrated adaptability by e ectively balancing front end development tasks with IT support responsibilities in a dynamic work environment.

## EDUCATION

**Can Tho University** **2020 - 2024**

Computer Science/2020-2024

- Gained practical experience through academic projects involving web development, deep learning, computer vision, and machine learning.
- Acquired strong problem-solving skills and a solid foundation in full-stack software development.

## PROJECT

**RedWolf Watching MEVN** **June 2023 - November 2023**

**Personal project**

- SQL (MySQL).
- NoSQL (MongoDB).

**VERSION CONTROL**

- Git, GitHub

**TOOL**

- Postman, Labellmg

## SOFT SKILLS

- Problem-solving & Debugging
- Effective Communication & Teamwork
- Time Management & Project Organization
- Willingness to Learn & Adaptability

**Overview:** Developed a web application for uploading and managing multiple movies.
Key Features:
- User registration and login
- Add, edit, and delete movies
- Save movies to favorites list
- Post and view comments

Technologies Used:
- **Frontend:** HTML, CSS, JavaScript, Vue.js
- **Backend:** Node.js (Express.js)
- **Database:** MongoDB
- **Cloud Service:** Cloudinary (for image/video uploads)
- **GitHub:** github.com/Nguyen-Nhu-Phuc/RedWolf-Watching-MEVN

**Course management website** **June 2023 - November 2023**

**Personal project**

**Overview:** Built a web platform to support managing and providing direct courses.
**Key Features:**
- User registration and login
- Add, edit, and delete teacher information
- Add, edit, and delete courses
- Delete students

**Technologies Used:**
- **Frontend:** HTML, CSS, JavaScript, Vue.js
- **Backend:** Node.js (Express.js)
- **Database:** MongoDB
- **Cloud Service:** Cloudinary (for media upload)
- **GitHub:** github.com/Nguyen-Nhu-Phuc/TeachFlow

**Deep Learning-based recognition of Vietnamese traditional games**
**July 2024 - November 2024**

**Personal project**

**Overview**: Develop a mobile application for recognizing Vietnamese folk games using deep learning algorithms.
**Key Features:**
- Upload an image from gallery or capture photo using camera
- Recognize Vietnamese folk games
- Retrieve game information from Gemini

**Technologies Used:**
- **Frontend:** JavaScript, React Native
- **Backend:** Flask (Python)
- **AI/ML Integration:** Gemini
- **GitHub:** github.com/Nguyen-Nhu-Phuc/TraditionGames
