OBJECTIVE

I am looking for a career opportunity in the field of web application development. I would like to contribute to a dynamic work environment where I can apply my knowledge to solve technical challenges. At the same time, I would like to grow my career through continuous learning and participate in diverse projects to enhance my skills and contribute to the success of the organization. I can work independently and in a team. And finally, I would like to become a professional full-stack developer.

TECHNICAL SKILLS

Front-end:

- HTML5, CSS3, JavaScript, TypeScript
- ReactJS, NextJS
- Tailwind CSS.
- Material UI (MUI): Components, theming, styling solutions.

Back-end:

WORK EXPERIENCE

TS68 Company **4/2024 - 7/2024**

INTERN

During the internship, I explored and worked with Material UI, Tailwind CSS, and Next.js through real project assignments.

Used Git for source code management and version control.

Contributed to developing and optimizing user interfaces, ensuring compatibility across various browsers and devices.

Strengthened teamwork, problem-solving skills, and the ability to quickly learn new technologies in a practical environment.

TS68 Company **7/2024 - 7/2025**

MAIN STAFF

Developed responsive user interfaces using Next.js and Tailwind CSS, based on pre-designed Figma layouts. Took on the role of Front-End Developer while also providing internal IT support.

Collaborated closely with UI/UX designers and Back-End developers to ensure pixel-perfect implementation and a seamless user experience.

Handled debugging, performance optimization, and ensured cross-browser compatibility.

Provided technical support by troubleshooting hardware/software issues and assisting in maintaining internal systems.

Demonstrated adaptability by effectively balancing front-end development tasks with IT support responsibilities in a dynamic work environment.

EDUCATION

Can Tho university **2020 - 2024**

Computer Science/2020-2024

Gained practical experience through academic projects involving web development, deep learning, computer vision, and machine learning.

Acquired strong problem-solving skills and a solid foundation in full-stack software development.

PROJECTS

TranThai-Request **05/2024 - 11/2024**

- NodeJS, Express (Basic)

Database:

- SQL (MySQL)
- NoSQL (MongoDB)

Version Control:

- Git, GitHub

ERP:

- ERP Next

Tool:

- Postman, Labellmg

SOFT SKILLS:

- Problem-solving & Debugging
- Effective Communication & Teamwork
- Time Management & Project Organization
- Willingness to Learn & Adaptability

CERTIFICATIONS

06/2025
Graduated with a Bachelor of Engineering (Computer Science), Second-Class Honours, from Can Tho University.

07/2025
VSTEP English Certificate – B1 Level (CEFR), issued by Can Tho University, 2025

INTERESTS

I enjoy cooking, watching movies, listening to music, and jogging to maintain a healthy lifestyle and work-life balance.

Front-End Developer

A team project developed by three software engineers for a Cambodian company.
The goal was to optimize internal communication and improve task tracking efficiency across departments.
I was responsible for designing and building the user interface using **Next.js**, **Tailwind CSS**, and **TypeScript**.
Worked closely with the Back-End team to integrate RESTful APIs and managed UI state using **React Hooks**.
The project significantly enhanced the request handling workflow and improved the user experience for internal staff.

Appvorio **06/2024 - 01/2025**

Front-End Developer

A team project developed by **three software engineers** for a commercial product.
The goal was to streamline internal communication and improve task tracking across departments.
I was in charge of designing and implementing the front-end using **Next.js**, **Tailwind CSS**, and **TypeScript**.
Worked closely with the Back-End team to integrate **RESTful APIs** and manage UI state via **React Hooks**.
The project significantly enhanced the request workflow and internal user experience.

Human resource management **05/2025 - 07/2025**

Front-End Developer

A team project developed by **three software engineers**, based on a pre-built UI kit and Figma designs.
The software was integrated with an approval management system to effectively handle employee records and approval processes.
I was responsible for designing and developing the user interface using **Next.js**, **Tailwind CSS**, and **TypeScript**.
Worked closely with the Back-End team to integrate **RESTful APIs** and manage UI state using **React Hooks**.

Container Truck Management **12/2024 - 07/2025**

Front-End Developer

A team project developed by **three software engineers**, based on a pre-built UI kit and Figma design.
The system was built for **container transport management**, enabling both drivers and managers to efficiently manage transport operations.
I was responsible for designing and developing the front-end using **Next.js**, **Tailwind CSS**, and **TypeScript**.
Worked closely with the Back-End team to integrate **RESTful APIs**, manage UI state with **React Hooks**, and

implement an **automated seal number recognition module**. If the seal recognition result was accurate, it was automatically stored in the system, helping streamline the validation process.
