INTERESTS

OBJECTIVE

My research interests are mainly concentrated on ontology merging, knowledge representation, description logic, and flexible methods for reasoning with ontologies. Moreover, my work is also in machine learning, data mining, and high-performance computing in computer vision, video/image classification through state-of-the-art algorithms, and deep learning methods.

ACADEMIC BACKGROUND

2019 – 2022: DOCTOR DEGREE

CRIL, CNRS & Artois University

Thesis: On Merging of Open-Domain Ontologies

Advisors: Prof. Sébastien Konieczny, Ivan Varzinczak, Zied Bouraoui

2011 – 2013: MASTER DEGREE

Can Tho University, Vietnam

GPA of Thesis: 9.3/10 (1st in class); GPA: 3.53/4.0 (1st in class)

Thesis: Controlling Robot Pioneer P3-DX to track object

Advisors: Thanh-Nghi Do and Nguyen-Khang Pham

2007 – 2011: BACHELOR DEGREE

An Giang University, Vietnam

GPA of Thesis: 9.8/10 (1st in class); GPA: 3.35/ 4.0 (1st in class)

Thesis: Building system to seek the best tourist places (ASP.NET, Blackberry and Android OS)

Advisor: Thai-Du Nguyen

INTERNSHIPS & PROJECTS

Project: Seeking the places in the tourist (Background: Website – ASP.NET, Blackberry and Android OS), INNORIA, Project in 5 years, (completed, 2011);

Project: AniAge project (Horizon 2020, European commission - H2020-MSCA-RISE-2015). Representing knowledge for Vietnamese Traditional Dances (2017-2018)

Project: ANR CHAIRE IA BE4musIA, (2020-2025). Merging Ontologies.
